

Buildings at the new Northwest Campus will be undergoing renovation.

Sanderson researches social factors in VR programs for deaf persons

by Pattie Cinelli

Robert G. Sanderson (G-'41) is spending a year at Gallaudet to research how social environment affects the success or failure of vocational rehabilitation (VR) programs for deaf persons.

Sanderson, who is the seventh person to hold the Powrie V. Doctor Chair of Deaf Studies, is on educational leave from the Utah State Office for Vocational Education where he is coordinator of Services to the Deaf Adult in the Division of Rehabilitation Services.

"During 15 years of rehabilitation counseling with deaf people . . . I have been repeatedly struck by the fact that occupational training, adjustment and placement—key words in the vocational

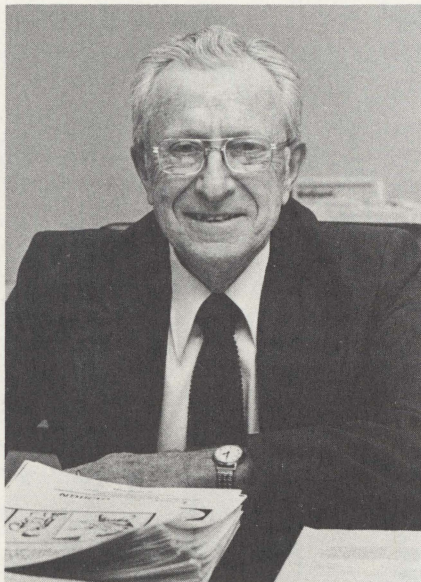

rehabilitation process—are not enough. The common saying among vocational rehabilitation counselors, 'You never close a deaf person's case,' arises from the frustration they feel at not being able to keep many of their clients on jobs long enough to get a closure—at least 60 days from the time of placement to the closing of the case. Even for many of those who are closed after the legal minimum time on the job, supportive services frequently extend for months, and sometimes even years," said Sanderson in his statement of his project concept.

He explained that the focus of his study is on the influence of certain social factors and the life style of the deaf individual in successful or unsuccessful completion of cases from a VR caseload. The purpose of the study is to determine whether or not those factors have a significant impact on the population being studied rather than merely upon isolated cases as observed by rehabilitation counselors of deaf persons.

Sanderson, who has been a Gallaudet Board of Fellows member since 1971, said he got inspired to apply for the Doctor Chair after meeting with McCay Vernon two years ago when Vernon was in the Doctor Chair. Vernon, a professor of psychology at Western Maryland College, was appointed to the Chair in 1979-80. He told Sanderson that it was a very stimulating position and he was having a wonderful time at Gallaudet. "I began feeling professionally burned out in Utah and started sprouting the seeds McCay planted," reflected Sanderson.

He said the idea for his project came from his work in Utah. "Anything that

Robert Sanderson holds this year's Powrie V. Doctor chair.

Webster visits Gallaudet

by Laura-Jean Gilbert

On Tuesday, Dec. 22, David Webster visited Gallaudet and had lunch at the Edward Miner Gallaudet home with the Merrills. Mr. Webster, who was the chairman of the Board of Marjorie Webster Junior College when that institution was sold in 1971, expressed personal satisfaction on behalf of himself and his mother, Georgia Webster, that Gallaudet has acquired the former two-year college and would be restoring the campus to its original condition and use as an institution of

higher education.

Marjorie Webster Junior College was founded by the Webster family in 1920 as a private post-secondary institution. Marjorie Webster, David Webster's aunt, was the president of the school and, at the time, was the youngest college president in the nation. It was begun as a school of expression and physical education. For its first few years, classes were held in a building in the Thomas Circle area. Then, in 1928, the Websters moved their college to the location on Kalmia Road in the upper northwest section of the District of Columbia. It was one of the first buildings in that wooded neighborhood near Rock Creek Park.

During its peak years, Marjorie Webster served a student body of 500 women, offering courses in seven areas: communication, liberal arts, fine and communication arts, merchandising, secretarial training, education and physical education. It had a full and part-time faculty of 50.

Marjorie Webster College gained fame in a classic court case in the District of Columbia in 1965 when the courts ruled in favor of the school and against the Middle States Association of Schools and Colleges. MSA had refused to consider the school for accreditation because it was not a non-profit institution. (Since that time, the MSA has changed its regulations

David Webster, right, talks with President Merrill during his recent visit to Gallaudet.

The Doctor Chair of Deaf Studies

The Powrie Vaux Doctor Chair of Deaf Studies was established in 1972 in recognition of the contributions of Powrie V. Doctor, a member of the Gallaudet faculty for 43 years.

Doctor held masters degrees from George Washington University and Gallaudet College, and a PhD from Georgetown University. One of his honorary doctorates was from Gallaudet College.

Doctor joined the Gallaudet faculty in 1928 as an instructor in English and history. He became an internationally known authority on education of the deaf. He served as executive secretary of the International Congress on Education of the Deaf in the U.S., participated in conferences such as the International Congress on Psychology in Moscow in 1966 and the International Congress of the Deaf in Stockholm in 1970. Also during that year, the Georgetown University Alumni Association honored Dr. Doctor with their William Gaston Award as an

outstanding educator. The American Speech and Hearing Association in 1969 recognized his "40 years of achievements and service for the deaf."

Dr. Doctor was editor of the American Annals of the Deaf, the oldest journal on deafness in the world and the oldest educational journal in the U.S., from 1948-68. He conducted more than 100 workshops for teachers of the deaf in the U.S. and lectured all over the world. At his death, he was chairman of the Department of Government at Gallaudet having also served as acting dean of the Graduate School for the 1970-71 academic year.

Dr. Doctor was attending the meetings of the World Federation of the Deaf in Paris at the time of his death.

Recipients of the Doctor Chair appointment are those persons who, through the pursuit of both educational and humanitarian causes, have contributed or may be able to

Sanderson

continued from page 1

impacts on rehabilitation affects me. I want to know as a professional and need to know about success and especially failures," said Sanderson. "We can provide equal services to a number of people but half will fail and half succeed. I want to know why."

Depending on the quantity of his results, Sanderson said he will publish his findings in a book, monograph or research paper. He plans to make personal visits to about six VR counselors and after such visits mail out question-

naires to a cross section of VR agencies. From his research, Sanderson said he has found that information on the sociology of deafness and rehabilitation is scattered and almost nonexistent. In addition to his research project, Sanderson is putting together an annotated bibliography on published and unpublished research studies in the area of vocational rehabilitation of deaf people.

During his year at Gallaudet, Sanderson is also guest lecturing in sociology and psychology classes and seeing students who seek information on research topics.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
01/15/82	NEH—Humanities Youth Projects
01/15/82	NIJ—Criminal Justice Performance Measurement
02/01/82	NIA Program Project Research Grants
02/01/82	NINCDS—Speech, Language Disorders Research Training
02/03/82	NSF Special Research Initiation (Information Science)
02/15/82	NEH—Humanities Research Conferences
03/01/82	NINCDS—Communicative Disorders Branch Research

NSF proposals

The National Science Foundation has announced a deadline of Feb. 3 for unsolicited proposals from new investigators in information science and technology.

Under a special awards program established in 1979, grant awards are open to researchers who received their doctorates within the past five years and have not been funded previously as principal investigators. These grants are awarded for a period of either one or two years.

Research projects will be funded in three areas—information science pro-

grams, information technology programs and information impact programs. For further information, contact the NSF division of information science and technology at (202) 357-9572.

Faculty Research

Described in this column are research projects that received assistance from the Office of Faculty and Graduate Student Research. For more details, contact Clarence Williams, x5030.

Cognitive processing

Anna Hauptman, a faculty member of the Research Institute's Center for Studies in Education and Human Development, completed her PhD dissertation last June. She studied the cognitive processing of two factors of spatial ability—spatial orientation and visualization.

The purpose of the investigation was to determine if these two factors would be evidenced with hearing impaired persons as they have been in studies with hearing individuals. Also investigated was the contribution of three hypothesized components of spatial problem solving—proportion, memory and figure/ground.

Three groups of subjects—hearing impaired high school students, hearing impaired college students and hearing college students—were tested with six spatial ability instruments.

Results suggest that hearing impaired students may use different cognitive strategies for solving spatial ability problems, and that the factor structures evidenced with hearing students are not similar to those of hearing impaired students.

Webster

continued from page 1

regarding profit and non-profit status.)

In 1971, the Webster family sold the College though they continued to hold a mortgage on the property. Three years later, the College went out of business. Since that time, in large part the buildings have been vacant and the property unused. The property was bought by the U.S. Fire Administration which originally intended to use it for a Fire Academy; however, they changed their plans and eventually decided to locate their academy on another site.

Over these years, the property has gradually run down and to some extent has been vandalized. Gallaudet must do major renovation and repair on the buildings before the Northwest Campus will be able to be used by Gallaudet. In the interim, the College has posted guards on the grounds and the Maintenance and Physical Plant staff are

beginning to do repairs and upkeep.

Gallaudet hopes to call on Mr. Webster's experience and knowledge of the property and buildings as it moves forward to institute repairs.

Webster explained that he was particularly happy to learn that Gallaudet had acquired the campus that bears his family name, because he has had an acquaintance with Gallaudet College over the years and thinks highly of our College. Gallaudet was one of the schools with whom the Marjorie Webster students competed in athletics during the school's most successful years. And, Webster is a member of a local Kiwanis group that, in the past, arranged special trips and programs for Kendall students.

Webster expressed the wish that his mother might have the opportunity to visit Kendall Green and meet the Merriells. He believes she would wish to have the Webster name perpetuated in some way on our new Northwest Campus.

Doctor Chair

continued from page 1

contribute significantly to Gallaudet College programs or to the welfare of deaf persons in general.

Appointment to the Doctor Chair is made upon recommendation to the Selection Committee, which receives nominations. Interested candidates under consideration may be asked to provide an outline of a proposal to contribute to Gallaudet's teaching programs, its research projects or the field of deafness in general.

One-year appointments to the Chair are generally made 18 months

to two years in advance. The Selection Committee is comprised of Gallaudet alumni, faculty, student and administration representatives.

The first person to hold the Powrie V. Doctor Chair was Leo Jacobs who during his stay at Gallaudet wrote a book titled, *A Deaf Adult Speaks Out*. He was a teacher of math at the California School for the Deaf in Berkeley. His book is now in its second printing after being updated and revised. Last year's recipient, Lionel Evans, is finishing a book about total communication. Evans is the headmaster of Northern Counties School for the Deaf in Newcastle-upon-Tyne, England.

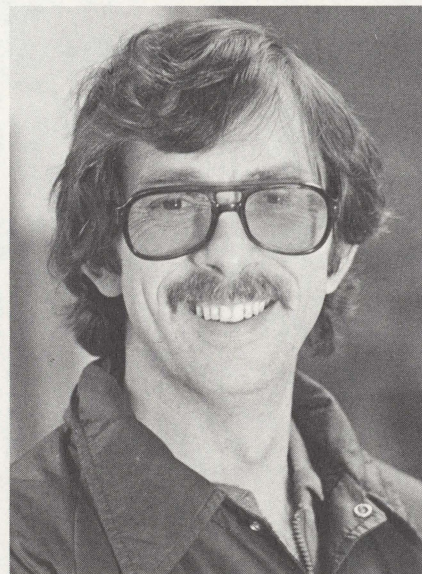

Among Ourselves

Three Gallaudet employees have been elected to office in the DC Chapter of the Gallaudet College Alumni Association. Mike Kaika, writer in the Office of Alumni and Public Relations, was elected president. Lynn Jacobowitz and Ruth Phillips, both employed by the Department of Sign Communication, were elected vice president and secretary, respectively. Henry Holter, an alumnus and frequent visitor on campus, was re-elected treasurer.

Jim Hull, manager of Systems Management and Ron Eng, assistant manager for Energy Conservation in the Maintenance and Operations Department, were invited to make two presentations during the American Association for the Advancement of Science's 148th Annual Meeting held in DC in early January. Their papers, on "Energy Conservation—An Increasingly Attractive Investment" and "The Energy Conservation Dilemma: Moving from Less Costing More," were part of the Jan. 7 poster session on "Energy Conservation."

Glenda Ennis from Pre-College Outreach coordinated the first Regional Conference on Residential Programming held at the Pennsylvania School for the Deaf Dec. 1-4. Nine schools for

the deaf within the primary service area sent 35 representatives to the conference. Ennis also recently returned from the Texas School for the Deaf where she coordinated a two-day workshop on residential programming and conducted a session on preventive discipline. The workshop was requested by the Texas school's new superintendent, Dr. Victor Galloway, and was sponsored by the Special Schools of the Future.

Mike Kaika is the new president of the DC Chapter of the GCAA.

Regional workshops help participants meet needs of deaf college students

Gallaudet College, with the support of the W.K. Kellogg Foundation, is presenting nine regional workshops on the subject "The Deaf Student in College." Beginning this month, the workshops will be held at universities across the United States.

The intensive one and a half day programs are designed to increase awareness of the special needs of deaf students and to promote development of strategies for more effective mainstreaming. Although they are planned specifically for college union, disabled student service and residence hall personnel, the workshops are opened to all interested persons. The project is being coordinated by Gallaudet's National Academy.

The series of workshops has been endorsed by the Association of College Unions International (ACUI), the Association of Handicapped Student Service Programs in Postsecondary Education (AHSSPPE) and the Association of College and Universities Housing Officers (ACUHO). A national planning committee has developed the project.

"As a handicapped service coordinator for some eight years and as president of AHSSPPE," Richard W. Harris commented, "I can attest to the need for greatly improving services and opportunities for hearing impaired students on our campuses. Outside of several 'specialized' post-secondary schools, most school programs probably offer only fair to poor support services for deaf students. Because almost all schools are or will be admitting increased numbers of students who are deaf or have a severe hearing disability, the series of workshops being presented is most timely and important."

The workshops will be held at the University of Massachusetts, Amherst, Jan. 22 and 23; Pennsylvania State University, University Park Campus, March 12 and 13; the University of Tennessee, Knoxville, June 14 and 15; Indiana University, Bloomington, May 24 and 25; the University of Minnesota, Minneapolis, June 24 and 25; the University of Texas, Austin, April 19 and 20; Lewis and Clark College, Portland, OR, April 19 and 20; the University of Arizona, Tucson, March 1 and 2; and California State University, Northridge, May 6 and 7.

in rehabilitation counseling programs can share resources and faculty expertise through joint ventures. Last year CARE sponsored a Job Fair/Workshop at Kendall School and developed a community Resource Directory in Rehabilitation.

Further information on the course in Independent Living may be obtained by calling Dr. Marita Danek, RCD program director, at x5586.

Independent Living course to begin

During the spring semester, a new graduate level course in Independent Living will be offered by the Department of Counseling. This course is co-sponsored by the graduate rehabilitation counseling programs at Coppin State College, George Washington University and the University of Maryland through the consortium of Capital Area Rehabilitation Educators (CARE).

This course is designed to provide information about the principles and practices of independent living as it applies to severely handicapped individuals and is intended to serve the training needs of professionals in the community as well as fulfilling elective course requirements for full and part time graduate students at Gallaudet.

A unique feature of the course is that students may register and take the course at Gallaudet or any of the other locations. The curriculum will be taught in modules so that faculty from each of the programs as well as outside experts

OTG deadlines

On the Green welcomes information submitted for publication by individuals and departments on campus. Such information will be used whenever possible, space permitting, and is subject to editing. Classified advertisements from any faculty or staff member are also printed free of charge as a service to the campus community.

The deadline for submitting information for OTG is 10 days prior to publication. Information can be sent to *On the Green*, Chapel Hall.

Spring deadlines are:

This pencil drawing by student Charles Smith of the Mississippi School for the Deaf is one of the winners in World Around You's Creative Contest. Entries in the art category are on display through Jan. 22 in the MSSD lobby.

AT&T offers long-distance discounts for hearing impaired customers

The American Telephone and Telegraph Company is now offering discounts for long distance residence direct interstate calls made by certified hearing and speech impaired customers.

These individuals placing direct dial long distance calls from residence telephones are now eligible for a 35% discount for daytime calls and a 60% discount for evening, night and weekend calls. Customers will be eligible for

these reduced rates upon certification of their disability by a physician, audiologist, speech pathologist or an appropriate state or federal agency.

For additional information, call 872-8655 voice and 872-8657 TDD from DC, or (800)424-8655 and (800)424-8657 TDD from Maryland, Virginia or West Virginia. Customers in other geographical areas may contact their local Bell Telephone Company Service Center for Disabled People.

Audiology congress scheduled

The XVI International Congress of Audiology and Satellite Symposia will be held in Helsinki, Finland May 23-27, 1982.

Gallaudet College will be sending an official delegation of one or two persons. If you are interested, you may submit abstracts to the Congress Secretariate by Jan. 30. The address is:

Tapani Jauhiainen, M.D.
Secretary General
Department of Otolaryngology
University Central Hospital

Haartmaninkatu 4 E
SF-00290 Helsinki 29
Finland

Persons whose papers are accepted will be contacted in February. Applicants must include the name of the author and type the paper in designated format. For the designated format, or for additional information, contact Karen King at the International Center on Deafness, x5316, or stop by Dawes House, room 101.

Elaine Costello is director of the Gallaudet College Press in College Hall.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

Personnel Hotline

In October, five new or revised policies were approved by the Board of Trustees relating to retirement, funeral leave, educational assistance, termination and tuition assistance. Since these policies affect all staff at Gallaudet, the following changes may be of interest:

1) The official retirement age for Gallaudet College is now 70 years of age. However, employees may work beyond age 70 with approval. Extensions are granted for one year at a time. The Personnel Office will be holding a Pre-Retirement lecture series in FY82, designed to ease the transition to retirement. Contact the office with ideas for the series, or for more information.

2) Legal guardians are now recognized as members of the immediate family for purposes of funeral leave.

3) The maximum amount of educational assistance granted to employees has increased to \$1,200 per year. Prior to October, staff were eligible for up to \$300 per semester. Administration of educational assistance has also changed. Although budget unit heads still determine eligibility, educational assistance is now paid from a central benefits pool. Courses to be reimbursed should be related to the employee's present position, to a potential position at Gallaudet or to a college degree.

4) As in the past, employees may be terminated without a warning letter for gross misconduct, insubordination or commission of a crime. Gross misconduct has now been defined to include such actions as drunkenness on duty, willful damage to College property, physical fights or inexcusable neglect of duty when the physical safety of students and employees is jeopardized by such neglect. Insubordination is defined as unruly physical or verbal resistance and willful disobedience of authority and work direction. The amount of severance pay granted to terminated employees who are not guilty of dishonesty, insubordination and gross misconduct has changed as follows:

Length of Employment	Amount of Severance Pay
Less than 1 year	None
1 year but less than 10 years	2 weeks base salary
10 years or more	2 weeks base salary plus 1 week base salary for each full 5 years of employment from date of hire.

Severance pay is different for those who are terminated due to a reduction in force (lay-off).

Length of Employment	Amount of Severance Pay
Less than 3 months	None
3 months but less than 1 year	1 week base salary
1 year but less than 3 years	2 weeks base salary
3 years but less than 6 years	3 weeks base salary
6 years but less than 10 years	4 weeks base salary
10 years or more	5 weeks base salary plus 1 additional week for each full 5 years of employment over 10 years.

5) Benefits upon termination have been clarified. Terminated employees can apply for a refund of their Civil Service contribution at any time prior to receiving a retirement annuity. Since employees are not eligible to receive an annuity until they have five years' service, anyone with less than five years' service is encouraged to apply for a refund. Vested employees can apply for a refund or opt to receive an annuity at age 62. Refunds are not automatic. Applications are available in the Personnel Office.

Terminated employees will have any federal health or life insurance benefits continued for 31 days after termination. A notice of conversion privilege will be sent to any covered terminated employee during this period.

Any annual leave remaining on the books will be paid to the employee upon termination. However, sick leave will lapse.

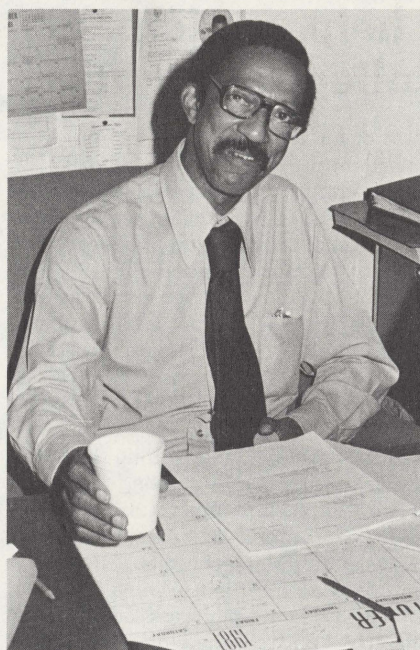

6) The maximum amount of tuition assistance for the families of employees with over five years' service has been raised from \$5,000 to \$6,500. The maximum yearly benefit is \$1,625 with benefits paid on a sliding scale according to length of service.

Under current IRS and U.S. Tax Court rulings, tuition assistance is considered taxable income to the employees.

There have been numerous minor changes to the above policies in addition to those listed above. You are encouraged, therefore, to read the following transmittals in the Administration and Operations Manual.

Policy	Transmittal #	Section #
Staff Retirement	86	10:21:00
Funeral Leave	20 (Revised)	10:07:00
Educational Assistance	36 (Revised)	15:01:00
Employee Termination	49 (Revised)	10:15:00
Tuition Assistance for Employees' Children	74 (Revised)	15:09:00

Please call the Hotline number, x5111 (voice/TDD) for further information.

Basketball team highlights . . .

Men's:

The men's basketball team, under second year coach Mike Rosenbaum, has gotten off to a good start this year, winning the first three games of the season before bowing to Hagerstown Community College by a lopsided score of 105-65.

The Bison cagers have played nine games thus far and are sporting a 5-4 record. The basketball team has already bettered last year's dismal 2-14 record.

The team's leading scorers are Billy Lange (17.3) and Joey Manning (13.0), with Kevin Milner and Pat Kuehn close behind with 9.5 and 8.5 respectively. Both Lange and Manning are leading rebounders, each averaging 9.6 per game. Teamwise, the Bison averaged 74 points per game.

The next home games are Jan. 13 and 15 at 8 p.m. in Hughes Gym.

Women's:

The women's basketball team opened the season on a winning note, defeating Goucher College, and in the second game of the young season, the Bisonettes defeated Johns Hopkins 63-60 in overtime.

The women then lost four straight games before posting their third victory of the season. Head coach Kitty Baldrige expects the team to improve as the season progresses. More than half the players on this year's team are newcomers.

Going into the semester break, the team had a 3-5 overall record. Leading scorers on the team are captain Debbie Sampson with 13.3 points per game average and Vickie Marlow with 12.5 points.

The next home games are Jan. 14 and 16 at 7 p.m. in Hughes Gym.

Broderson posters

Persons interested in obtaining posters of artist Morris Broderson, whose paintings were on exhibit at Gallaudet this past fall, can contact the Office of Fine Arts in Education in House #8. Art Leaders, Ltd., has two Broderson posters available: "Edo Quintet" at \$25 and "Bette Davis" at \$20.

Bowling begins

A meeting to discuss establishing faculty and staff bowling leagues will be held this Thursday, Jan. 14 at 12 noon in the multi-purpose room of Ely Center.

All faculty and staff from the entire campus who would like to join a league are encouraged to attend the meeting.
